Oklahoma

CAC Cryptographic Logon

Implementation Briefing

19 April 2006

Prepared by OK CCL Project Group

Briefing Purpose

1. Briefly explain the need and benefit of CCL.

2. To identify who will be affected by this CCL Implementation.

3. What you will need to be CCL capable.

4. To summarize Oklahoma's CCL Implementation schedule.

5. To explain what steps all users must take to ensure they are ready for implementation.

Need for CCL & Benefit of CCL

1. DoD computer networks are continual targets of malicious attacks intended to disrupt operations or learn of our plans.

2. The most common means of unauthorized entry into DoD networks is via stolen Log-in name and password. These can be stolen remotely by hackers, as well as by careless work habits.

3. Using a physical device (your CAC card), and a PIN of your choosing significantly reduces the chance for unauthorized access to DoD computer networks.

4. The CAC / PIN combination is next defensive measure to be implemented to protect DoD computer networks.

Who Will Be Affected By CCL

1. All account holders in the OK Domain, to include:

   Army AGR
   Army Dual Status Technicians
   Army Non-Dual Status Technicians
   Air Guard AGR and Techs (on OK Domain only)
   State Employees
   Contractors
   Traditional Members with established accounts

   All other Traditional Members, Retirees and others will be added
   at a future time TBD by NGB.

The Four Things You Need for CCL

1. A valid (not expired) Common Access Card.
2. A valid Personal Identification Number for your CAC.
3. A CAC Card Reader installed on your computer.
4. A computer that is connected to the OK-Domain.

Details on how to obtain or confirm you have these items follow

The Four Things You Need for CCL

1. *A valid (not expired) Common Access Card.*

If you have an current account on the OK Domain, you are eligible for a Common Access Card as part of CCL Implementation.

If your CAC is expired, or you need your first CAC, you must go to a DEERS/RAPIDS site.

A detailed list of DEERS/RAPIDS sites in Oklahoma can be found in the JFHQ Home Page under the CAC area.

The Four Things You Need for CCL

2 *A valid CAC Personal Identification Number (PIN)*

If you are getting a new CAC, your PIN will be created when you visit DEERS/RAPIDS.

If your CAC is valid but you need to reset your PIN, you must visit a CAC PIN Reset (CPR) site. These sites can reset your PIN only.

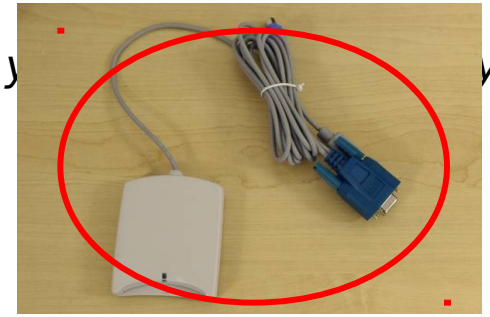
A detailed list of CPR sites in Oklahoma can be found in the JFHQ Home Page under the CAC area. (One is located at Help Desk)

Do not visit DEERS/Rapids if all you need is a PIN Reset

The Four Things You Need for CCL

3. ***A CAC Card Reader installed on your computer.***

If y *ys* *t*



If you Have a Laptop System – look for one of these:

We Have One for You If You Need One !!

The Four Things You Need for CCL

4. *A computer that is connected to the OK-Domain.*

To make CAC work, your computer needs to have software will be installed on your computer.

The software will be “pushed” or loaded remotely onto all computers in the OK Domain.

When not TDY, leave you system connected to the network.

We will perform nearly all CAC-enabling tasks remotely for you.

OK CAC Implementation Schedule

1. NGB has scheduled Oklahoma to implement CAC Jun-Jul 06.

2. To be ready, OK has back-planned CAC tasks to the following:

   All Domain Users obtain CAC – 15 May

   Current CAC Holders Have PIN 1 May

   All Domain users report if they need CAC Reader 1 May (We will send out query).

   All remaining computers equipped with CAC Readers – 15 May

Additional Information

The JFHQ Home Page now has a CAC link. Click on it for useful information on the topics covered in this briefing, and for future CAC-related efforts. (The JFHQ information contains OK Domain-specific implementation information.)

The OKNG Public Web site has a link for CAC general information available to the public from DoD sources.
